Miss Lottie Jones had a lively experience yesterday at the ball grounds. She went down in the morning and wearying of the monotony of standing around watching the game, she was induced to take a ride on horseback. The horse she mounted was gentle enough for a man to ride, but not being used to the swish of lady's skirts, took fright and ran away with her. The young lady was brave and the excitement was only fun for her. But Eddie Bauer, whose heart was in a flutter about this time at the peril of the fair one, jumped on another horse and pursued the fleeing girl in all haste. After chasing her for two or three miles, he overtook the runaway, who laughed at his fright and was brought back unharmed. She did not know that the horse she was riding was running away and is now anxious to have the same experience over again. Eddie says he would not object either.

Mr. Surdam lives on the San Pedro river, and reports the stock range in his section never better nor the cattle fatter at this season of the year. ## COPPER IS THE METAL.

The Cochise Copper Mining Company, Bisbee, Arizona.

This company owns a very valuable group of mines situated in Warren mining district, county of Cochise, Arizona, lying immediately east of and adjoining the town of Bisbee, and adjoining the property of the Copper Queen Consolidated Mining company on the north. The latter company has been in operation for about twenty years, and employs about 1,500 men daily in the operation of its mammoth mine and smelters, and as a result has produced copper to over 34,000,000 pounds during the year 1898, and the net proceeds of such production are reported to have been over \$2,000,000, and it has been said by experienced miners who have been under its employ for years, that the Queen mine now has sufficient ore in sight to keep it in constant operation for the next twenty years without further development.

Is it not reasonable to believe that the property of the Cochise company is fully as valuable, when it is within such close proximity to such a wonderful mine?

The blasts set off in the underground workings of the Queen property can easily be felt and heard at the shaft of our mine, and oftentimes the concussion has attracted marked attention.

The original owners of these valuable mines are local business men, well and favorably known in Bisbee and surrounding vicinity, who are doing their utmost to make this enterprise a success in every respect. The board of directors are original owners, and are donating their services to the company until such time as the mine will pay dividends. They own the controlling interest in this property, and as a protection to stockholders have placed their entire interest in escrow for a term of one year.

The stock books of our company are now open for subscriptions, and a limited number of shares are offered at ten cents per share. No application for less than 100 shares will be accepted.

The company reserve the right at any time to advance the price of shares without further notice, or to reject any application for stock at their discretion.

Every cent received from the sale of stock will be expended toward the development of our property and the erection of hoisting works, and all other necessary improvements, and to make our enterprise a success in every particular.

We invite investigators and their experts or their engineers to closely scrutinize our property.

Applications for shares may be made to any of the directors of the company, or to any of our legally authorized representatives.
